Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the claims limitations call for a three-layered medical stent, while the specification discloses a two-layered stent.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 31-34 and 36-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Mayer (U.S. Patent 5,824,077).

Mayer disclose a stent (16) made from a composite filament having a first layer (82) with a radiopacity less than the radiopacity of the second layer (86) and a third layer (84) as is claimed (figures 12 and 13, column 7 lines 5-7 and column 10 lines 3-14)

4. Claims 31-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacobs et al. (U.S. Patent 6,387,123).

Art Unit: 3738

Jacobs et al. disclose a stent (12) having a first layer (18) made from stainless steel with a radiopacity less than the radiopacity of the second layer (20) and a third layer (22) as is claimed (figures 1 and 2 and column 4 lines 24-44 and 58-67).

Please note that the claims in the current application received the filing date of 01/05/2004 because the current claims call for a three-layered stent while the specifications in the priority documents disclosed a two-layered stent.
